Many thousands of years after the calling of the Satanist, an ancient evil, named Metron, is reborn. There is no salvation. There is almost no one to oppose him. Only one person can kill it. I really don't understand. This movie is excellent, but it has too low rating. It's interesting parody for mainstream and exploitation movies. So bad special effects, that they are good. Interesting story about demon named Metron. Actors played really good. Nikolay Yeriomin worked at his role very good. His character is psychologist. He wants to help Polina, but nothing can do. Also, directors couldn't find actress and made 3d woman model. It's so funny! All 62 minutes I was laughing. That movie is really good comedy and parody. I think, that laughter prolongs life. For me Metron movie is good amateur Russia-Ukrainian movie. 646f9e108c
